

SHEREX Cold Formed Rivet Nut Announcement

SPO

SPX

SFO

SKO

Tonawanda, NY – December, 2008: Sherex Fastening Solutions, an industry leader in the manufacturing and distribution of blind rivet nuts announced today the launch of a fully cold formed version of M10 rivet nuts in 304 Stainless Steel.

“The benefits of the cold formed product version compared with the machined product version include; stronger threads, wider product offering (hexagonal shank, 2nd grip, etc...) and larger production quantities,” said Adam Pratt, Vice-President of Sherex Fastening Solutions. “This new program also offers improved cost competitiveness. Currently there are 4 different types available in 1st grip range, and other versions are available upon request.”

The Dejong TUBTARA[®] 304 Stainless Steel M10 sizes currently available are: **SPO** (Flat Head, Round Shank, Open End), **SPX** (Flat Head, Round Shank, Closed End), **SFO** (Countersunk Head, Round Shank, Open End), and **SKO** (Low Profile Head, Round Shank, Open End). Part numbers, drawings, and technical information is now available through Sherex.

Sherex Fastening Solutions a leader in the manufacturing and distribution of Sherex blind rivet nuts, brass inserts, and other specialty fastening products. Sherex rivet nuts are ideal for providing load-bearing threads in thin materials and blind applications. All blind rivet nuts and brass inserts are manufactured to Sherex’s strict quality control programs and Sherex provides unsurpassed customer service and support before and after the sale.
