Sherex Fastening Solutions Announces Pacific Warehouse Sales as its TEC Series Western Region Master Distributor

Sherex Fastening Solutions, a global leader in engineered fasteners, tooling, and automation, is pleased to announce Pacific Warehouse Sales (PWS) as the Western Region Master Distributor for its TEC Series wedge locking washer product line.

PWS will provide sales and service to distributors in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming. TEC Series products will be stocked in their distribution facility in Chino, California to provide short lead times to customers throughout the region.

“PWS has been a trusted partner for many years with our thin sheet metal attachment solutions,” says President Adam Pratt, “and we are excited to expand our partnership with them and to continue to jointly provide the high quality sales and service our customers expect from Sherex and PWS.”

“We are pleased to represent TEC Series in the Western region,” says Vice President Kelly Lehman, “our customers expect best-in-class performance, availability, and value, and TEC series washers provide all of those things. This agreement with Sherex expands our product portfolio, and builds on years of successful partnering with Sherex.”

TEC Series washers maintain clamp load in high vibration and load applications, protecting fastened joints from vibrational loosening using proven wedge locking technology. TEC washers secure joints using tension, rather than friction, as other traditional methods use.

Sherex launched the TEC Series product line in June 2017, leveraging 35 years of success in the fastener industry, world-class engineering and development expertise, and global manufacturing capabilities.

TEC Series washers are available in standard and large outer diameter styles in carbon steel and stainless steel, in sizes from M3 (#5) through M72 (3”). Sherex’s engineering and technical sales team is available to custom design products with special dimensions, materials, and coatings.
